Biological tablets

Description - dry preparation/ biological activator in tablet form of nonpathogenic micro-organism cultures, enzymes, inorganic salts and fragrance.

Applications - Maintenance or seeding of any kind of tank :

- Septic tanks;
- Holding tanks;
- Cess-pools.

Advantages -

- Concentrated formulation;
- Maintains biological equilibrium of facilities;
- Elimination of blockage and odour reflux problems;
- Consequent spacing of emptying (minimum 3 times less);
- Rapid and reinforced action due to joint presence of micro-organisms (sustained action) and enzymes (immediate action);
- Rapid inoculation of new septic tanks and acceleration of restart after prolonged disuse;
- Rapid dissolution of the product;
- Natural product, free of caustic soda and respectful to the environment;
- Totally risk-free handling: product neither toxic nor harmful;
- Excellent product stability and shelf life;
- Easy-to-apply individually packaged tablets.

Directions for use -

Apply 1 tablet in the toilet bowl every 2 weeks. Wait until the end of effervescence to flush.

Characteristics -

- Aspect: cylindrical tablet;
- Color: blue-green;
- Perfume: lemon;
- Shelf life: 2 years.

Packaging -

One jar contains 12 (of 20 g each) effervescent tablets. The tablets are individually packaged.

Handling and storage -

- Keep out of reach of children;
- Irritating to eyes;
- Contains limonene, may produce an allergic reaction;
- In case of contact with eyes, rinse immediately with plenty of water and seek medical advice;
- If swallowed, seek medical advice immediately and show container or label;
- Contains enzymes, do not breathe dust;
- Labeling: Irritant;
- Store in a cool, dry place.

Disinfectants and strong detergents are toxic to micro-organisms: apply biological products last. To ensure successful treatment, keep to the recommended dose rates and apply the products on a regular basis.

In case of blockages or important waste accumulation, treat with chemical products or mechanical action before beginning the biological treatment.

Responsible for International Co-operation.
